**Hazard classification of specified hazardous substances**

Tick all that apply

<input type="checkbox"/> Class 1: Explosives	<input type="checkbox"/> Class 1: Retail fireworks
<input checked="" type="checkbox"/> Class 2: Flammable gases	<input type="checkbox"/> Class 2: Aerosols
<input type="checkbox"/> Class 3.1: Flammable liquids	<input type="checkbox"/> Class 3.1: Flammable liquids where processing conditions, high temperature or pressure, may create major accident hazards
<input type="checkbox"/> Class 4.1: Self-reactive substances and mixtures	<input type="checkbox"/> Class 4.2: Pyrophoric liquids and solids
<input checked="" type="checkbox"/> Class 4.3: Substances that emit flammable gases in contact with water	<input type="checkbox"/> Class 5.1: Oxidising gases
<input type="checkbox"/> Class 5.1: Oxidising liquids and solids	<input type="checkbox"/> Class 5.2: Organic peroxides
<input checked="" type="checkbox"/> Class 6.1: Acute toxic	<input type="checkbox"/> Class 6.9: Specific target organ systemic toxicity (single exposure)
<input checked="" type="checkbox"/> Substances that react violently or liberate toxic gas on contact with water	

**Public warning in case of major incident**

General information about how the public will be warned in the event of a major incident at the facility:

1. In the event of an emergency situation involving hazardous substances, a qualified operator would activate Genera's safety procedures and Emergency Response Plan.
2. Depending on the seriousness of the incident, occupants of the site and neighbouring properties will be instructed to evacuate if required for their safety.
3. Genera workers will stop any traffic and direct members of the public away from the site until emergency services arrive and take over and/or give Genera workers instruction.

**Public actions in case of major incident**

General information about how the public should act and any precautionary steps that people should take if a major incident occurs at the facility:

1. In the event of a major incident, members of the public are advised to stay up wind, if possible, and take further instructions from emergency services or Genera workers monitoring the perimeter.
2. There may be risk of immediate harm from fire, fumes or gases. The public is advised to hear and follow the instructions of the emergency services or Genera workers monitoring the perimeter.
3. Genera fumigation workers are fully trained and are equipped with gas detectors so that they can determine if gas is present. They will be aware of the wind direction and will identify and implement necessary controls to reduce the risk to the public.
4. The public who are within view of Genera should take note of the flag on the site and the wind direction at the time, to ascertain where the up wind direction is. Up wind is the direction the wind is blowing from, so you can avoid having gas blown towards you.
