

Restricted Entry Intervals for Pesticide

In accordance with regulation 13.23 of the Health and Safety (Hazardous Substances) Regulations 2017, and under delegated authority by WorkSafe New Zealand, I, **PAUL MOLLOY**, being satisfied that:

- (a) the human exposure to the substance is primarily through inhalation or contact with the skin;
and
- (b) scientific data available for the substance is significantly reliable to enable a restricted entry interval to be set;

set the following restricted entry interval for a pesticide to protect persons from the toxic effects of the substance:

Substance: Meteor

Approval Number: HSR101023

Restricted entry interval(s): 4 days

Dated at **Wellington** this 12th day of August **2019**.

PAUL MOLLOY, Manager Technical Programmes and Support, WorkSafe New Zealand.
