

Amended decision document: This decision document supersedes the one issued on 12 August 2019.

Amendment

Previous wording:

In accordance with regulation 13.23 of the Health and Safety (Hazardous Substances) Regulations 2017 and under delegated Authority by WorkSafe, I Paul Molloy being satisfied that:

- a) The human exposure to the substance is primarily through inhalation or contact with the skin; and*
- b) Scientific data available for the substance is significantly reliable to enable a restricted entry interval to be set;*

set the following restricted entry interval for a pesticide to protect persons from the toxic effects of the substance:

Changed to:

*Under regulation 13.23 of the Health and Safety at Work (Hazardous Substances) Regulations 2017 the following restricted entry intervals are set **where a pesticide is used according to the directions for use on the label:***

This amendment restricts the applicability of REIs to "where a pesticide is used according to the directions for use on the label."

The amendment comes into effect the day the decision was signed.

RESTRICTED ENTRY INTERVALS FOR PESTICIDE

Under regulation 13.23 of the Health and Safety at Work (Hazardous Substances) Regulations 2017 the following restricted entry intervals are set where a pesticide is used according to the directions for use on the label:

Substance:	Meteor
Approval Number:	HSR101023
Restricted entry interval(s):	4 days
